## FLIPSCALE F3 200 & 100

The compact folding design creates room for its large 2.5" x 2.0" stainless steel weighing platform.

Capacities available are 100 x 0.01 and 200 x 0.01 Grams.

The much improved FlipScale F3 adds 4 additional weighing units over the previous F2 model.

Clear removable weighing tray snaps onto the outer shell of the scale for easy access and storage.

The F3 WEIGHMETER technology helps prevent scale overloading.

A great new feature that extends the life of the scale for years and years of accurate use.

## Specifications

<b>Power</b>	2 CR2032 Batteries (included)
