## MBSC ULTRA

Whether you're weighing newborns, toddlers, pets, foods, postcards, letters, parcels, envelopes, mailing tubes, padded packs, small boxes, medium boxes or even large boxes, this scale has been designed to suit your needs perfectly. The MBSC Ultra low profile design offers maximum safety and its hold function stores or locks the weight of a baby, so it can easily be read even if the baby is moving around or removed from the scale. The large LCD offers a detachable faceplate with 2 ft. cord, perfect for mounting in your nursery or office.

The MBSC Ultra dual range design allows accurate reading of small letters in 0.1oz increments, while larger packages are read in 0.5oz increments. You no longer need one scale for letters and another for boxes..

<b>Power</b>	AC Adapter (included) 4 C Batteries (not included)
